

Sales Data Analysis Report

Dataset: SalesData

Analysis Period: 2023

Prepared By: Faiza Mirza

Tools Used:

- Microsoft Excel
- Pivot Tables
- Charts
- Data Analysis Techniques

Introduction

This report analyzes sales transaction data to identify revenue trends, customer purchasing behavior, and product category performance. The analysis was performed using Microsoft Excel, including Pivot Tables, charts, filtering, and sorting techniques.

Dataset Overview

Column	Description
Transaction ID	Unique transaction identifier
Date	Date of purchase
Customer ID	Customer reference number
Gender	Customer gender
Age	Customer age
Product Category	Product group
Quantity	Number of items purchased
Price per Unit	Cost per item
Total Amount	Total transaction value

Business Questions

Key Questions:

What is the total sales revenue?

Which product category generates the highest revenue?

Which customer gender contributes more sales?

Which age group has the highest purchasing activity?

How do sales change throughout the year?

Sales Performance Analysis

Sales by Product Category

Insight:

Electronics generated the highest revenue with \$156,905, contributing approximately 34.4% of total sales. Clothing followed closely with \$155,580, while Beauty generated \$143,515.

Customer Analysis

Sales by Gender

Insight:

Female customers generated \$232,840 in revenue compared to \$223,160 from male customers. Sales contribution was balanced between both groups.

Sales by Age Group

Insight:

Customers aged 18–27 generated the highest revenue (\$107,915), while customers aged 58–67 contributed the lowest revenue (\$61,680).

Sales Trend Analysis

Monthly Sales Trend

Insight:

Monthly sales showed fluctuations throughout the year, with certain periods experiencing higher customer demand. These trends can help businesses plan inventory and marketing strategies.

Key Findings Summary

- ✓ Total revenue reached \$456,000.
- ✓ Electronics was the highest-performing category.
- ✓ Female customers contributed slightly higher sales.
- ✓ Younger customers (18–27) generated the highest revenue.
- ✓ Sales trends showed changing customer demand throughout the year.

Recommendations

- Focus marketing efforts on high-performing categories such as Electronics and Clothing.
- Create targeted campaigns for customer groups with lower purchasing activity.
- Use monthly sales trends for inventory planning.
- Monitor customer behaviour to identify future sales opportunities.
